Guidelines and Tips for Selecting Environmental Education Initiative

General Requirement	
Theme and learning	The initiative must be relevant to sustainability and/or carbon neutrality
objectives	The initiative must be relevant to sustainability and/or carbon neutrality
Period of	Environmental education initiative conducted between September 2024 and
implementation	February 2026 (i.e. 2024/25 school year and first term of 2025/26 school year)
Suggested scope	i. A single outstanding environmental education activity, OR
suggested scope	ii. A series of interrelated environmental education activities focused on the same
	theme
	<u>Avoid</u> listing all environmental education activities implemented throughout the entire school year
Made of teaching /	
Mode of teaching /	Both online, offline and blended modes would be considered
activity	Eventual include but not limited to
Example	Examples include but not limited to:
	• Lesson plan
	Cross-curricular/ Cross-disciplinary learning activity
	Life-wide learning activity
	Whole-school campaign/initiative
	Activity organised by parent-teacher association
Important note	• Schools who participated in the "Best Green Education Initiative Award" in the
	past years (i.e. 2021 to 2024) shall not submit an initiative that is entirely the same
	as their previous entries when participating in the "2025 Best Green Education
	Initiative Award". If certain activities overlap with past submissions, the Organiser
	will evaluate the extent of duplication and determine the school's eligibility for
	participation and award on a case-by-case basis
	• The activities mentioned in the initiative must be held within the implementation
	period (i.e. 1 September 2024 to 28 February 2026). Any activities conducted
	The state of the s
I	outside the implementation period will not be counted in this year's assessment
	outside the implementation period will not be counted in this year's assessment

Other Key Considerations	
Assessment Criteria	Guiding Questions
(3) Design and creativity	 What learning and teaching strategies or mode of delivery (e.g. style, interaction) are adopted in the activity? What kinds of teaching materials are used in the initiative? How do the activity and related teaching materials engage participants' attention towards environmental protection and foster their interest/motivation in learning? Does the activity connect to the participants' real-life experiences? Does the activity offer opportunity for participants to practise or apply what they have learnt?
(4) Outcome and impact	 What are the outcomes and effectiveness of the activity? What is the feedback from participants on the activity? Have participants experienced changes in knowledge, attitudes and behaviours after participating in the activity? What methods are adopted to assess the effectiveness of the activity and/or the overall learning outcomes of the participants (e.g. surveys, participants' reflections)? Has the initiative been promoted externally and have its outcomes been shared with external parties? Through what channels have the initiative and its outcomes been promoted and shared? Can the initiative be further sustained and enhanced (e.g. conducting related extension activities, expanding its audience coverage)?
